## WORK HAPPENINGS BRIEFLY TOLD

An unusually severe hail wave in Franco caused the 846-foot Elbow dam which divides the waters of the river between nurseries and salmon, to blow down.

The total cost of Great Britain's extended air force program up to 1938 will be about \$100,000,000. The House of Lords was informed by the secretary for air, Lord Londonderry.

Canada has decided to invite the nations of the world to take part in a great international exhibition in Paris in 1937. The estimated cost is \$20,000,000.

The British Columbia cabinet announced during the year ended June 30, 1934, totalled 1,003,929 acres. The revenue from the land was \$1,000,000. The revenue from the land was \$1,000,000. The revenue from the land was \$1,000,000.

Establishment of a free wheat market for Soviet Union wheat was announced, and will take effect after delivery of the present harvest.

Prattley, B.C. member for Alia and minister without portfolio in the provincial cabinet, was elected as U.F.A. member.

Alia has accepted the British government's invitation to engage in discussions prior to the 1935 conference, and the Italian delegation will be in London at the end of the month.

French-Chinese, the first Indian to make a flight from India to England has started on the first stage of his journey.

Canada's total exports of paper and manufactures of paper in June were \$7,277,892. This was lower than in May when the total was \$8,674,887, but considerably greater than June of last year when it was \$5,648,610.

**Good For Making Soap**

**Silica Black New Chemical Found**

The black dust in coal smoke which soils the hands and the collar shows up as a good soap-making chemical, in a discovery just announced.

The discovery is a new chemical called silica black, found by Dr. C. A. Jacobson of West Virginia University and reported to the American Chemical Society.

The silica black is a fine, white, powdered bituminous coal and powdered distillate, a form of silica produced millions of years ago by volcanic organisms living in the sea.

The smoke escapes through the smokestacks and the silica black, which is a better job at converting vegetable oil into soap and even into edible fat. Both are pink and the "smoke" catalysts are fine particles and cause the vegetable oil to clarify.

Experiments conducted by Dr. Jacobson and Dr. Lorin R. Williams indicate that the silica black is as useful as a pigment for paints that will stand both acid and alkali.

The silica black is a fine, white, powdered bituminous coal and powdered distillate, a form of silica produced millions of years ago by volcanic organisms living in the sea.

The silica black is a fine, white, powdered bituminous coal and powdered distillate, a form of silica produced millions of years ago by volcanic organisms living in the sea.

## Rulers Of Millions

Native Chief From Nigeria Pay Visit To London

Three men who have never seen a road, nor a cinema or a ball point pen, and who do not understand a word of English, were going to visit London recently.

They are the Sultan of Sokoto, the Emir of Kano, the Emir of Zaria, and the Emir of Gwandu, ruler of 280,000 people on the north-western boundary of Nigeria.

They and their entourage and Sir Alister Allen, the Consul General, who arrived on the same train, made the most startling appearance Paddington station has seen for years.

Prattley, minister for the Interior, accompanied the four rulers, who were dressed in traditional dress, and were wearing turbans, royal blue, gold brocade, velvet, and silver, and were wearing turbans, royal blue, gold brocade, velvet, and silver.

The dignity of these men, accompanied by Sir Alister Allen, the Consul General, who arrived on the same train, made the most startling appearance Paddington station has seen for years.

Prattley, minister for the Interior, accompanied the four rulers, who were dressed in traditional dress, and were wearing turbans, royal blue, gold brocade, velvet, and silver.
